

CUSTOM EXTRUSION AND INJECTION PRODUCTION

Extrusion

Plastic tubes and hoses

Used to transport liquid and gaseous media.

We produce tubes and hoses to suit the requirements supplied by the customer.

Material: PP, PE, LDPE, HDPE, PVC.
Diameter: 2 – 63 mm.
Colour schemes: according to RAL colour scale or a sample.

Profiles

Based on materials supplied, we are able to produce profiles using extrusion and coextrusion.

Material: UPVC, PVC, TPE, ABS, PS.
Profile weight: max. 4 kg/m.
Profile width: max. 230 mm.
Colour schemes: according to RAL colour scale or a sample.

Injection

Plastic mouldings

We have 1 extrusion machine and 8 injection machines.

On our injection moulding presses we process a wide range of plastics including additional components to improve the properties of mouldings according to customer requirements.

We also press parts from TPE material.

We inject into our own moulds as well as into moulds supplied by the customer.

We also produce custom-made moulds according to customer requirements.

Material: PP, PE, PA, PS, ABS, EVA, PMMA, TPE.
Moulding weight: max. 390 g.
Mould dimensions: max. 550 x 500 mm (measured between machine posts).
Colour schemes: according to RAL colour scale or a sample.
